

# Soundswell Attention & Listening Intervention [SALI]

Attention & Listening are *core skills*: they are *learnt* skills.

Some children haven't had the chance to develop these critical skills and until they do, a significant proportion of what teachers say will simply *pass them by*. The impact on learning is obvious.

SALI actively *teaches* children what they need to know.

## Included in this course are 2 booklets

- 1. Handbook:** theoretical background, details the contents of the resource & how to use it
- 2. Intervention plans:** 26 sessions, activities and required resources

## Learning outcomes: by the end of this session, participants should...

- understand how attention skills (& the other 4 core skills essential for any kind of learning) develop & why they are important
- be familiar with main principles of running successful groups, including the content & format
- know how to teach 'good listening'
- have had a chance to practise some of the group activities
- be confident to establish a baseline, record progress, measure impact & decide what to do next
